ENGIE signs a deal with Canadian Solar's e-STORAGE to bolster UK grid flexibility with two battery projects in Scotland

These projects act to accelerate ENGIE's commitment of reaching 10 GW of battery storage globally and empower renewable energy growth in the UK.

ENGIE is pleased to announce a significant milestone in its ambition to increase flexible generation capacity by signing a deal with Canadian Solar's e-STORAGE to build two 50 MW 2 hour duration battery sites in Scotland.

The projects are located at greenfield sites in Cathkin (South of Glasgow) and Broxburn (West of Edinburgh). Construction is scheduled to begin in Q1 2024, and they are expected to be fully operational in Q1 2025, connecting into SPEN's 33kV distribution network.

Alongside ENGIE's existing 2.1 GW of pumped storage assets in the UK, a growing BESS portfolio will strengthen ENGIE's leading position in energy storage and flexibility in the UK. It will also bolster the Group's contribution to the reliability and efficiency of the UK grid infrastructure, providing the necessary flexibility during times of increasing energy demand and aid the transition to renewable energy sources.

ENGIE has selected Canadian Solar's e-STORAGE as a delivery partner for these projects due to their track record, proven expertise in battery storage, and commitment to health and safety as number one priority.

"At ENGIE, we are excited to work with Canadian Solar's e-STORAGE and are pleased to have signed EPC contracts for our two 50 MW / 100 MWh BESS projects at Cathkin and Broxburn in Scotland. We are looking forward to the construction stage of this project, and are happy to be working with a company with the technical solution and delivery capabilities of Canadian Solar, who are also aligned with our commitment to a high standard of Health and Safety." – Aidan Connolly, Head of Battery Storage UK

About ENGIE

ENGIE is a global reference in low-carbon energy and services. With its 96,000 employees, its customers, partners and stakeholders, the Group is committed to accelerate the transition towards a carbon-neutral world, through reduced energy consumption and more environmentally-friendly solutions. Inspired by its purpose ("raison d'être"), ENGIE reconciles economic performance with a positive impact on people and the planet, building on its key businesses (gas, renewable energy, services) to offer competitive solutions to its customers. Turnover in 2022: 93.9 billion Euros. The Group is listed on the Paris and Brussels stock exchanges (ENGI) and is represented in the main financial indices (CAC 40, Euronext 100, FTSE Euro 100,

MSCI Europe) and non-financial indices (DJSI World, Euronext Vigeo Eiris - Europe 120 / France 20, MSCI EMU ESG screened, MSCI EUROPE ESG Universal Select, Stoxx Europe 600 ESG-X).
