

Environment Policy Statement

ENGIE UK considers the environment to be at the heart of our service delivery and it underpins all that we do. It is the policy of the business that all of our activities are carried out in accordance with the requirements of our Management System. We are committed to preventing pollution and reducing our environmental impacts. This is aligned with our purpose to improve the lives through better living and working environments.

ENGIE is the leading provider in three key areas; energy, services, and regeneration. We combine these capabilities to meet the needs of individuals, businesses and communities throughout the UK. Our customers benefit from our energy efficient and smart building solutions, the provision of effective and innovative services, the transformation of neighbourhoods through regeneration projects, and the supply of reliable, flexible and renewable energy.

Our Approach

ENGIE's integrated management system certified to ISO14001 defines and governs our approach to identifying and reducing our environmental impacts through our activities where we have operational control. We seek to work with relevant interested parties to make necessary improvements and influence decisions of others.

Leadership Commitments

At top management level we are fully committed to improving our environmental performance across all of our business activities, specifically:

- Protecting the environment and preventing pollution wherever possible from our activities.
- Minimising our Carbon and Ecological Footprint
- Identifying risks and opportunities.
- Taking accountability for the effectiveness of our Integrated Management System.
- Providing the necessary resources to achieve our commitments.
- Commitment to continual improvement of the integrated management system to enhance environmental performance.

Our Objectives

As part of our annual review of our integrated management system we identify and set objectives, to ensure that our significant risks are mitigated and managed and that improvements can be implemented.

Our Environment plan will be documented for employees to see, made available to all requesting parties and signed off by the Corporate Responsibility & Environment Director.

As a minimum, our objectives will include:

- Identifying and fulfilling all compliance and other obligations associated with our activities.
- Identifying our significant environmental risks.
- Reducing all impacts on the environment as part of Our Future Plan.
- Reviewing our policy statement and management system annually.
- Communicating with all relevant interested parties on our commitments and environmental management system.
- Aligning with the requirements of the ENGIE Group.

Significant Risks

As part of determining the risks and opportunities associated with our activities, we have identified our significant risks and we are committed to reducing these significant risks. We will ensure the necessary resources and support from top management is provided to achieve this.

We ensure that this policy is cascaded and communicated to employees throughout our business and available upon request for interested parties.
